AMBIT EMERGING GIANTS SMALLCAP PORTFOLIO

What drives success for corporate India?

Our research over the past few years shows that over and above firm-specific competitive advantages, three factors are essential for a company to consistently outperform

The bottom 40% of the BSE500 stocks on accounting quality have underperformed the top 60% by a whopping 12% per annum since Nov 2010

CONSERVATIVE CAPITAL ALLOCATION

Indian companies are amongst the most aggressive capital allocators in the world and that aggression costs their shareholders dear.

GOOD GOVERNANCE & LACK OF POLITICAL CONNECTIVITY

Firms whose central competitive advantage is political connectivity seldom outperform in India.

Ambit Emerging Giants Smallcap Portfolio is your solution to identify these traits for sustainable wealth creation through Indian equities

Why Small caps?

Successful identification of companies that can upgrade to a higher category leads to disproportionate returns...

Avg Performance CAGR %		FY24				
		1-100	101-250	251-500	501-1000	
	1-100	15.7%	7.5%	-6.2%	-32.7%	
	101-250	29.4%	18.0%	5.5%	-17.5%	
FY14	251-500	45.6%	29.6%	16.2%	-8.3%

Why Small caps?

- The BSE500 experiences heavy annual churn: On average, as much as 30% of the BSE 500 constituents get churned over a 5 year period
- Moreover, the bulk of the outperformance for BSE500 entrants occurs prior to their entry in the index!

Relative performance of BSE500 inclusions (pre and post inclusion)

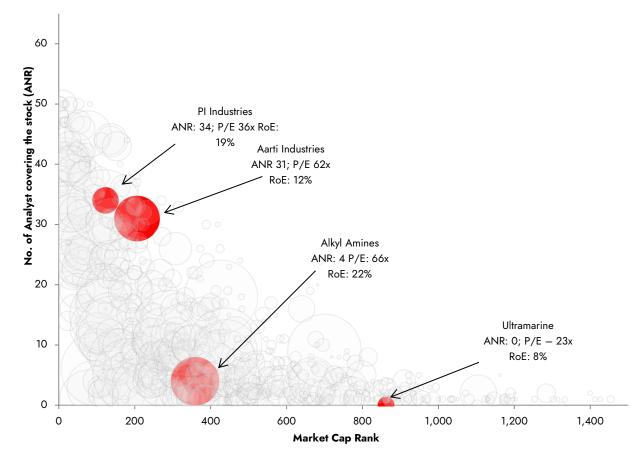

Median CAGR of BSE 500 Inclusions (Relative to BSE 500)

Source: Ace Equity, Ambit Capital Research. Relative returns (to BSE 500) are medians CAGR of stocks that have been included in the BSE 500. For prior returns, returns are measured until 1 quarter preceding the quarter of entry.

Period of BSE500 constituent data analyzed – 2002-2020.Only firms with both pre and & post inclusion pricing data are considered. *Annual 5 Year churn over 2002-2015 (closing period ends in 2020)

Price discovery is inefficient in Small Caps

Small caps are largely undiscovered with low analyst coverage and lower liquidity resulting in valuation disconnect with fundamentals

UN-DISCOVERED with low analyst coverage:

On average only 3-4 analyst cover a small-cap stock vs. ~34 analyst coverage for large-caps

÷

LOW LIQUIDITY is a challenge:

Daily Trade Volume of a Large-Cap company is Rs 220 Cr. whereas for small-cap its just Rs 4.5 Cr.

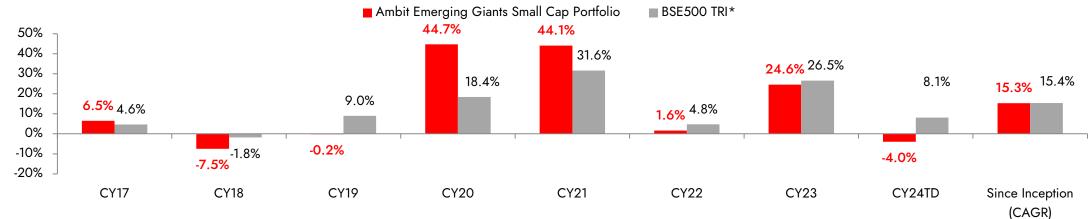

UNDER-OWNED with low Institutional ownership: Large-Caps, with an Institutional ownership of ~55% are over-owned by Mutual Funds & FIIs vs. ~10% in case of Small-caps

Size of Bubble signifies trailing P/E Ratio (x) as on 16/04/2024 ANR refers to No. of analyst covering a particular stock

How did we deliver this?

• Good risk adjusted returns is an outcome of Good Processes characterized by:

Stringent quantitative filters

3

- Each offering is based on deeply researched and back tested framework to generate the investment universe
- High threshold for performance over long spans of time, greatly minimize chances of poor performers or poor quality companies entering into the investment universe
- High quality of accounts and corporate governance is uncompromised

2

Experienced team & deep-dive research

- Dedicated and experienced research team
- Research processes inspired by IE Research
- Investment Committee to approve all investment decisions
- Part of larger Ambit group lends advantages
- Focus on what is knowable and what is important

Focus on earnings growth + earnings quality

- Lower obsession with timing when one is investing in a superior calibre of companies
- Companies with a consistent track record and leadership traits are preferred
- Past track record + Future sector potential + Current management capabilities = Comfort on delivering quality earnings

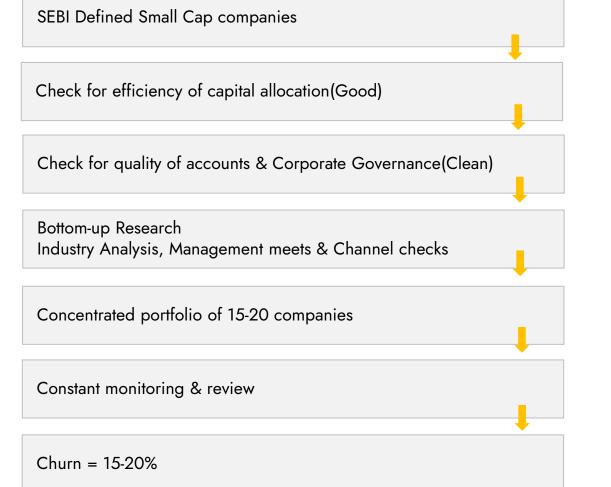

4

Risk management

- Concentrated Portfolios deliver best returns as returns do not get average out
- Lower drawdowns due to consistent performers in secular sectors
- Long term orientation with low churn realize the power of compounding

1

Stringent quantitative filters

Invest in firms which are:

(a) Good - On the basis of capital allocation track record and quality of improvement in financial metrics over the past six years, and
(b) Clean - Based on the quality of their accounts & corporate governance.

- The focus on 'good' helps generate upside while not compromising on 'clean' reduces downside risk. Essentially, while the objective is to generate returns, the even bigger goal is to better manage drawdowns because we believe doing the latter successfully is critically vital in achieving the former.
- The bigger idea is to identify small cap businesses, with strong leadership position in the micro or niche market that they are operating in. It not only gives them effective pricing power but help them gain in scale and become large companies of tomorrow
- These businesses have Zero or near Zero leverage with ethical and prudent management. When investing in small cap business, we believe its of paramount importance to look for companies with strong management pedigree, with established competence and unparalleled integrity.
- This funds draws down lesser than the market in corrections and has low churn (not more than 15-20% of portfolio).

Ambit's proprietary Good & Clean Framework identifies winners early

Ambit's proprietary forensic accounting model helps steer clear firms with questionable accounts

A. Incremental capex year on Accounting checks year P&L Mis-statement ·Abysmally low CFO/EBITDA ratio over a long run B. Conversion of F. Cash Generation investment to sales ·High volatility in Depreciation Rates (CFO) (sales growth) Boasting earning through lower debtor provisioning **B/S Mis-statement** ·Low Cash yield implying balance sheet misstatement Writing-off losses directly through balance sheet ·High contingent liability E. Balance sheet C. Pricing discipline **Pilferage Checks** discipline (D/E, (PBIT margin) equity dilution) ·High Miscellaneous expenses [•]Unsubstantiated capex or delay in plant commissioning ·Historically generating negative free cash flows D. Achieving efficiency in Increasing advances to related party capital employed Auditor Quality turnover Our greatness framework looks at holistic and consistent growth as ·High auditor remuneration

Ambit's 'greatness' framework identifies efficient capital allocators in the country

the hallmarks of efficient capital allocation- a self sufficient growth engine without the need of tapping external capital frequently is key to long term wealth creation.
