Why Small caps?

- The BSE500 experiences heavy annual churn: On average, as much as 30% of the BSE 500 constituents get churned over a 5 year period*
- Moreover, the bulk of the outperformance for BSE500 entrants *occurs prior* to their entry in the index!

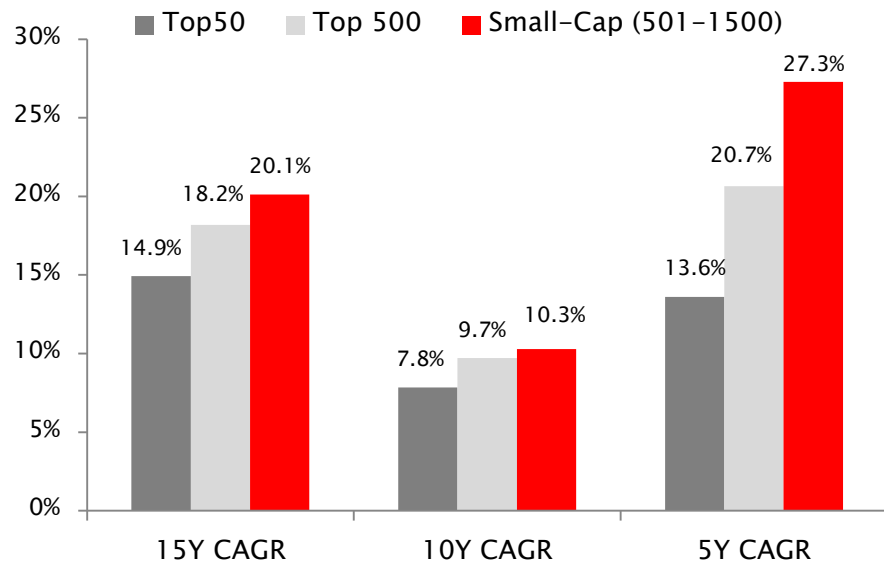

Relative performance of BSE500 inclusions pre and post inclusion

■ Median CAGR of BSE 500 Inclusions (Relative to BSE 500)

Source: Ace Equity, Ambit Capital Research. Relative returns (to BSE 500) are medians CAGR of stocks that have been included in the BSE 500. For prior returns, returns are measured until 1 quarter preceding the quarter of entry. Period of BSE500 constituent data analyzed – 2002-2018. Only firms with both pre and & post inclusion pricing data are considered.
 *Annual 5 Year churn over 2002-2013 (closing period ends in 2018)

Small caps have outperformed their larger peers historically in India

Source: Ace Equity, Ambit Capital Research. Ending Period June 30, 2018.
 Method: We calculate returns by assuming a purchase of three baskets of stocks – Top 50 (largest 50 stocks by market-cap), Top 500 (largest 500 stocks by market-cap) and Small-caps (501-1500 ranked stocks by market-cap). Stocks are rebalanced annually each July end as per the bucket criteria over July'2003-June'2018. Equal amounts are assumed to be allocated to each stock. Dividends received are reinvested; Transaction costs assumed: 3% for Small-caps; 1% for Top500 and 0.5% for Top50;

Price discovery is inefficient in small caps

Smallcaps are largely undiscovered with low analyst coverage and lower liquidity resulting in valuation disconnect with fundamentals

Size of Bubble signifies FY2018 P/E Ratio (x)
ANR refers to No. of analyst covering a particular stock

Source: Ambit Capital Research.

- ❑ Under-owned with low Institutional ownership
Large-Caps, with an Institutional ownership of ~55% are over-owned by Mutual Funds & FIs vs. ~10% in case of Small-caps
- ❑ Un-discovered with low analyst coverage:
On average only 1 analyst cover a small-cap stock vs. 37 analyst coverage for large-caps
- ❑ Low Liquidity is a challenge
Daily Trade Volume of a Large-Cap company is Rs 300 Cr. whereas for small-cap its just Rs 1.3 Cr.

Ambit's Forensic Accounting Framework

Ambit's forensic accounting framework helps steer clear of Small-caps with dubious financials

Accounting checks

P&L Mis-statement

- Abysmally low CFO/EBITDA ratio over a long run
- High volatility in Depreciation Rates
- Boasting earning through lower debtor provisioning

B/S Mis-statement

- Low Cash yield implying balance sheet misstatement
- Writing-off losses directly through balance sheet
- High contingent liability

Pilferage Checks

- High Miscellaneous expenses
- Unsubstantiated capex or delay in plant commissioning
- Historically generating negative free cash flows
- Increasing advances to related party

Auditor Quality

- High auditor remuneration

Methodology

We look at six years of consolidated financials for the BSE500 universe of firms.
We first rank stocks on each of the 11 ratios individually (outlined in the table on the left) within a sector.
These ranks are then cumulated across parameters to give a final pecking order on accounting quality for stocks within each sector

Within sub-BSE500 firms, accounting quality drives investment performance

Construct & Structure

Fund Type	SEBI Registered PMS
Fund Tenure	Open Ended
Structure	Discretionary PMS
Minimum investment	INR 25 lacs
Stock selection	Investible universe is stocks that perform well on the two frameworks noted earlier. A further subjective assessment then leads to a more concentrated stock portfolio
Number of stocks	< 20
	25% per sector, 10% per stock
	All cap with BSE Smallcap as the benchmark
Time horizon and turnover	The investment horizon is 1–3 years and longer; turnover therefore should not exceed 30–35% in a year
Cash calls	Not to take aggressive cash calls; this is keeping in mind the longer term investment horizon of the fund and is suitable from a taxation standpoint

Appendix

The bulk of the run up in 2017 was in poor quality stocks..

Moreover, the major small cap rerating this year has predominantly played out in firms with poor RoCEs

Source: Ace Equity; Note: (i) Universe – Ambit’s sub-BSE500 HAWK universe (~900 stocks); (ii) Q1 = Top 20% percentile in FY2016 RoCE; (iii) Negative P/B ratios are excluded;

- ❑ Poor quality firms (on FY2016 RoCEs) have seen the highest rerating, with the worst quintile seeing an ~80% jump in their multiples on average

Similarly, small caps with good accounting quality continue to be ignored in the current environment

Source: Ace Equity; Note: (i) Universe – Ambit’s sub-BSE500 HAWK universe (~900 stocks); (ii) Q1 = Top 20% Accounting Quality; Period – Nov’16: Nov’17’. Figures are median reratings

- ❑ Firms with poor accounting have seen their stocks rerate the highest over the past year on a P/B, EV/EBITDA and P/E basis.

..while quality small caps remained reasonably priced

Small caps with good accounting quality trade at a discount to firms in the lowest quality quintile
