

Ambit Emerging Giants Small Cap Portfolio

Ambit Asset Management

February 2024

What drives success for corporate India?

Our research over the past few years shows that over and above firm-specific competitive advantages, three factors are essential for a company to consistently outperform

CLEAN ACCOUNTING

The bottom 40% of the BSE500 stocks on accounting quality have underperformed the top 60% by a whopping 12% per annum since Nov 2010

CONSERVATIVE CAPITAL ALLOCATION

Indian companies are amongst the most aggressive capital allocators in the world and that aggression costs their shareholders dear.

GOOD GOVERNANCE & LACK OF POLITICAL CONNECTIVITY

Firms whose central competitive advantage is political connectivity seldom outperform in India.

Ambit **Emerging Giants** Smallcap Portfolio is your solution to identify these traits for sustainable wealth creation through Indian equities

Why Small caps?

Successful identification of companies that can upgrade to a higher category leads to disproportionate returns...

Avg. Performance CAGR %		FY10			
		1-100	101-250	251-500	501-1000
FY20	1-100	6%	21%	34%	
	101-250	-6%	9%	21%	37%
	251-500	-20%	-34%	6%	22%
	501-1000	-32%	-18%	-9%	5%

% shift from one category to another		FY10			
		1-100	101-250	251-500	501-1000
FY20	1-100	53%	15%	3%	
	101-250	28%	24%	12%	3%
	251-500	6%	23%	32%	10%
	501-1000	8%	20%	23%	34%
	Exclusion	5%	18%	30%	53%

Few WIN BIG
Some WIN
Many SURVIVE
Most LOSE

Why Small caps?

- The BSE500 experiences heavy annual churn: On average, as much as 30% of the BSE 500 constituents get churned over a 5 year period
- Moreover, the bulk of the outperformance for BSE500 entrants occurs prior to their entry in the index!

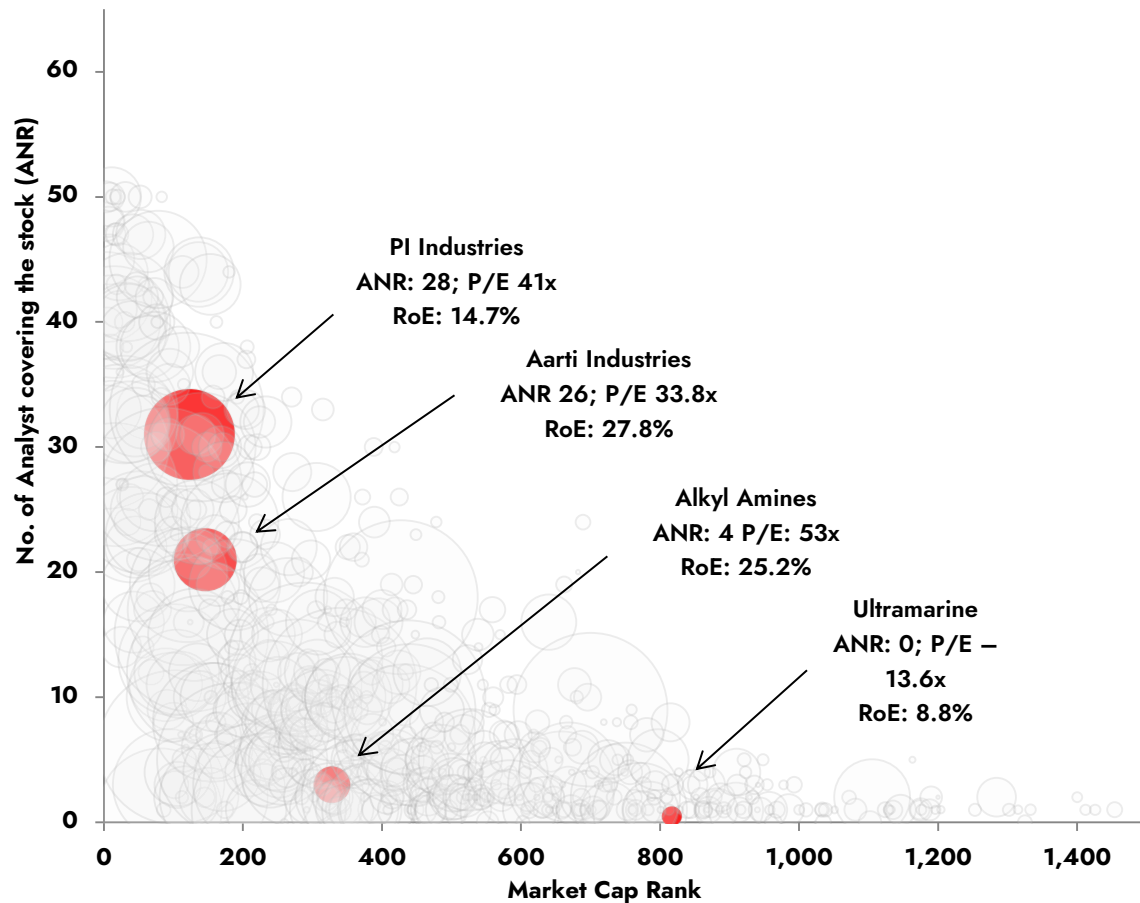

Relative performance of BSE500 inclusions (pre and post inclusion)

Source: Ace Equity, Ambit Capital Research. Relative returns (to BSE 500) are medians CAGR of stocks that have been included in the BSE 500. For prior returns, returns are measured until 1 quarter preceding the quarter of entry .
Period of BSE500 constituent data analyzed – 2002-2020. Only firms with both pre and post inclusion pricing data are considered.
*Annual 5 Year churn over 2002-2015 (closing period ends in 2020)

Price discovery is inefficient in Small Caps

Small caps are largely undiscovered with low analyst coverage and lower liquidity resulting in valuation disconnect with fundamentals

Size of Bubble signifies trailing P/E Ratio (x) as on 21/04/2023
ANR refers to No. of analyst covering a particular stock

Source: Ambit Capital Research.

❑ **UN-DISCOVERED** with low analyst coverage:

On average only 3-4 analyst cover a small-cap stock vs. ~34 analyst coverage for large-caps

+

❑ **LOW LIQUIDITY** is a challenge:

Daily Trade Volume of a Large-Cap company is Rs 220 Cr. whereas for small-cap its just Rs 4.5 Cr.

=

❑ **UNDER-OWNED** with low Institutional ownership:

Large-Caps, with an Institutional ownership of ~55% are over-owned by Mutual Funds & FII's vs. ~10% in case of Small-caps

Ambit Emerging Giants Small Cap Portfolio : Performance Track Record

*BSE 500 TRI is the selected benchmark for the Ambit Emerging Giants Small cap Portfolio and the same is reported to SEBI.

How did we deliver this?

- Good risk adjusted returns is an **outcome** of **Good Processes** characterized by:

1 Stringent quantitative filters

- Each offering is based on deeply researched and back tested framework to generate the investment universe
- High threshold for performance over long spans of time, greatly minimize chances of poor performers or poor quality companies entering into the investment universe
- High quality of accounts and corporate governance is uncompromised

3 Focus on earnings growth + earnings quality

- Lower obsession with timing when one is investing in a superior calibre of companies
- Companies with a consistent track record and leadership traits are preferred
- Past track record + Future sector potential + Current management capabilities = Comfort on delivering quality earnings

2 Experienced team & deep-dive research

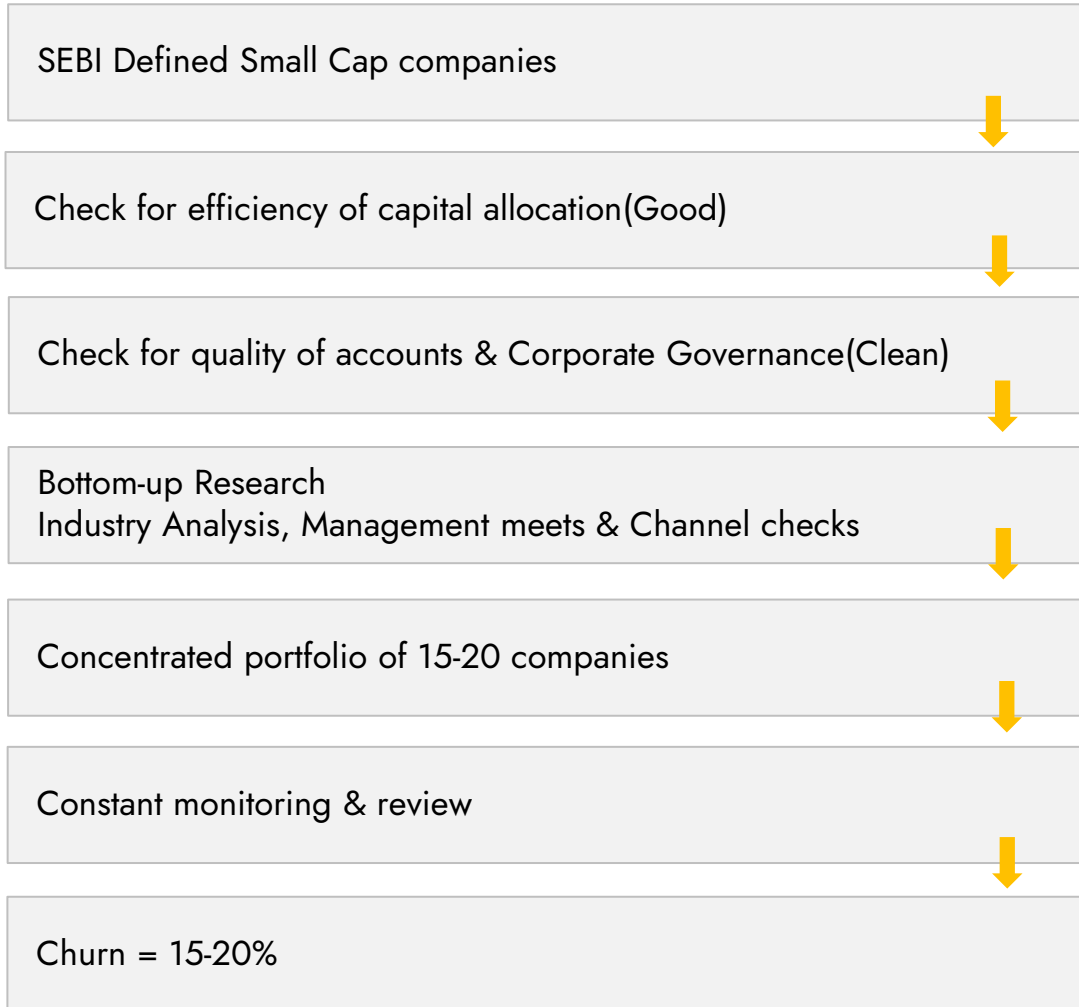

- Dedicated and experienced research team
- Research processes inspired by IE Research
- Investment Committee to approve all investment decisions
- Part of larger Ambit group lends advantages
- Focus on what is knowable and what is important

4 Risk management

- Concentrated Portfolios deliver best returns as returns do not get average out
- Lower drawdowns due to consistent performers in secular sectors
- Long term orientation with low churn realize the power of compounding

1

Stringent quantitative filters

- Invest in firms which are:
 - (a) **Good** - On the basis of capital allocation track record and quality of improvement in financial metrics over the past six years, and
 - (b) **Clean** - Based on the quality of their accounts & corporate governance.
- The focus on 'good' helps **generate upside** while not compromising on 'clean' **reduces downside risk**. Essentially, while the objective is to generate returns, the even bigger goal is to better manage drawdowns because we believe doing the latter successfully is critically vital in achieving the former.
- The bigger idea is to identify small cap businesses, with **strong leadership position** in the micro or niche market that they are operating in. It not only gives them effective pricing power but help them gain in scale and become large companies of tomorrow
- These businesses have **Zero or near Zero leverage** with ethical and prudent management. When investing in small cap business, we believe its of paramount importance to look for companies with strong management pedigree, with established competence and unparalleled integrity.
- This funds draws down lesser than the market in corrections and has low churn (not more than 15-20% of portfolio).

Ambit's proprietary Good & Clean Framework identifies winners early

Ambit's proprietary forensic accounting model helps steer clear firms with questionable accounts

Accounting checks

P&L Mis-statement

- Abysmally low CFO/EBITDA ratio over a long run
- High volatility in Depreciation Rates
- Boasting earning through lower debtor provisioning

B/S Mis-statement

- Low Cash yield implying balance sheet misstatement
- Writing-off losses directly through balance sheet
- High contingent liability

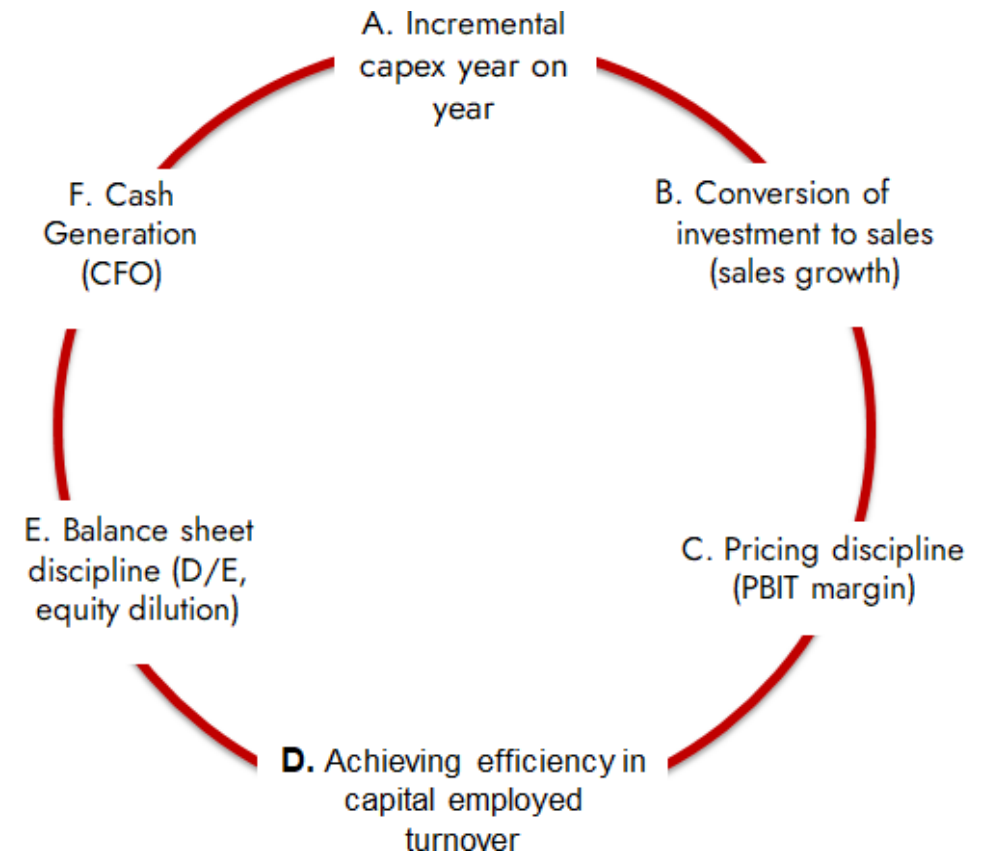

Pilferage Checks

- High Miscellaneous expenses
- Unsubstantiated capex or delay in plant commissioning
- Historically generating negative free cash flows
- Increasing advances to related party

Auditor Quality

- High auditor remuneration

Ambit's 'greatness' framework identifies efficient capital allocators in the country

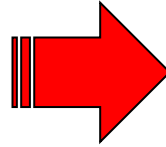

Our greatness framework looks at holistic and consistent growth as the hallmarks of efficient capital allocation- a self sufficient growth engine without the need of tapping external capital frequently is key to long term wealth creation.

Tomorrow's ten baggers

31 firms have outperformed the BSE100 by 10x or more since 1994 (excluding Financials or firms with market cap less than US\$100mm). We take a subset of these 31 and identify the drivers of their outperformance i.e. the operating levers which differentiate great firms from the rest of the market. We then apply these drivers of greatness in today's context to identify 71 firms in the BSE500 (which are most able to deliver on these drivers). Of these 71 firms, 25 pass our accounting disciplines and governance filters (see Exhibit 1). This is the "Great 25".

Going beyond "Good & Clean" and thinking long term

Whilst the consistent and marked outperformance of our Good & Clean (G&C) portfolio over the past year has attracted attention, we have also been criticised by clients for the 'short termism' of the G&C portfolio. (The G&C portfolio are constructed using: (i) a battery of financial tests based on the previous fiscal year's data, and (ii) our forensic accounting model. Each G&C portfolio typically runs for a quarter before we revise it.) Hence, in this note we have used multi-year financial analysis to create a list of 25 great Indian companies that have the potential to be tenbaggers in the coming decade.

Step 1: Defining greatness

We identify firms that have delivered 10 times as much returns as the BSE100 over the last 15 years. We call these firms 10Xers. After filtering such firms (there are 31 of them) for weak accounting quality and corporate governance, we get a final list of 14 stocks. It is these 14 stocks that we use to identify the drivers of greatness.

Step 2: The drivers of greatness

We identify what differentiates a great firm relative to an average firm at each stage of the value generation process: investment, conversion of these investments to sales, pricing discipline, balance sheet discipline and cash generation.

Not only do the great firms perform significantly better than an average firm on a variety of measures encompassing the five aforementioned stages, even more interestingly the great firms show a more consistent and calibrated approach to growth over long periods of time.

Step 3: Investment Implications

We apply the winning formula (i.e. the drivers of greatness) to the BSE500 as Financials universe of firms over the more recent past (FY06-FY11). We find that 71 firms are able to muster passing scores on two-thirds of the drivers. Of these 71, 25 firms pass our accounting quality and corporate governance standards. These 25 firms are shown in Exhibit 1. Of these 25 firms, 13 are trading below their five year valuation averages.

Many of the firms which emerge from this filtering approach – Tata Power, BHEL, Voltas, Cummins – are cyclical. Obviously, the fate of these firms is tied to the economy and the interest rate cycle. However, to the extent that we are relatively close to a turn in the rate cycle, even from a cyclical perspective these companies look relatively well placed.

Beachcombing 'Quality' in the face of 'volatility'

Small-cap companies (Rs2bn-30bn m-cap) witnessed a strong FY18 in terms of fundamentals. They also delivered +17% weighted average share price performance, outperforming BSE500 by +6%. Pace of fresh capital infusion in small-caps also picked up mid-FY18; on average, firms raised capital to the extent of +17% of their mcap. Developments w.r.t our beachcombing stocks (Safari, GMM Pfaudler, Alkyl Amines) were largely in line with our thesis. These include themes like sustained improvement in business mix and industry-specific structural advancements (e.g. shift to organised in logistics). But some unexpected developments, e.g. BEPL's unexpected plant outage and MTP registering subdued points volume, dampened investor sentiment. Whilst we don't rule out market volatility in the near term (BSE SmallCap oscillated from -7% to +9% YTD2018), fundamentally sound companies would be in the spotlight. Alkyl Amines, GMM Pfaudler and Mold-Tek Packaging are our top picks.

POSITIVE Quick Insight

Beachcombing status

Company	Stk	Return	EV/EBITDA	P/B
Alkyl Amines	AA	10.2%	10x	1.5x
GMM Pfaudler	GPM	11.7%	10x	1.5x
Garware Wall Ropes	GWR	11.0%	10x	1.5x
Tasty Bite Foods	TBF	11.0%	10x	1.5x
Mold-Tek Packaging	MTP	10.8%	10x	1.5x
Alfa Amino	AA	10.8%	10x	1.5x
GMM Pfaudler	GPM	11.8%	10x	1.5x
Safari	S	10.1%	10x	1.5x
Mold-Tek Packaging	MTP	10.0%	10x	1.5x

Small-caps: The year gone by

Small-caps were the focus for most part of FY18. This was a result of improving macro – FY18 headline GDP growth was recorded at 6.7% versus 7.1% in FY17. In addition, even a huge liquidity surge in the market (net foreign and domestic inflows in the stock market were US\$225bn in FY18) resulted in increased investor risk appetite for small/mid-caps. A combination of the above factors led to healthy out-performance of small-caps versus broader market indices such as BSE500 index (see exhibits 1 to 4 below).

Whirl GDP growth in the latter half of the year improved (2HFY18 GDP growth –14bps higher than 1HFY18), small-mid-caps saw a fair bit of correction towards the end of FY18 (and continue to do so) as investor appetite started to reduce and valuations started to normalise.

AMBIT EMERGING GIANTS SMALL CAP PORTFOLIO

Ambit Asset Management launches
Ambit Emerging Giants Small cap
Portfolio on PMS platform in
December 2017

Companies covered: Gujrat Ambuja Exports; Bhansali Engineering Polymer; Garware Wall Ropes; Tasty Bite Eatables; Safari Industries; Alkyl Amines; GMM Pfaudler; Camlin Fine Science; Mold-Tek Packaging

Ambit Emerging Giants are **LEADERS** and **WINNERS** in growing industries

- Stellar track records of capital allocation in terms of RoE
- Low debt with the median portfolio company cash positive
- Median market cap of the portfolio is ~Rs6,434 cr.
- Growth potential above the comparable index
- Reasonable valuations for quality stocks
- Niche segment leaders will create industries in 7-10 years
