

# Ambit Good & Clean Mid Cap Portfolio

**Ambit Asset Management**

**February 2024**

# What drives success for corporate India?

Our research over the past few years shows that over and above firm-specific competitive advantages, three factors are essential for a company to consistently outperform

## **CLEAN ACCOUNTING**

The bottom 40% of the BSE500 stocks on accounting quality have underperformed the top 60% by a whopping 12% per annum since Nov 2010

## **CONSERVATIVE CAPITAL ALLOCATION**

Indian companies are amongst the most aggressive capital allocators in the world and that aggression costs their shareholders dear.

## **GOOD GOVERNANCE & LACK OF POLITICAL CONNECTIVITY**

Firms whose central competitive advantage is political connectivity seldom outperform in India.

Ambit **Good & Clean Midcap** Portfolio is your solution to identify these traits for sustainable wealth creation through Indian equities

# Ambit Good & Clean Mid Cap Portfolio : Performance Track Record

## CALENDAR YEAR RETURNS

## POINT TO POINT RETURNS

Ambit Good and Clean Mid cap Portfolio inception date is Mar 12, 2015; Returns as on 31<sup>st</sup> Jan, 2024; Returns are net of all fees and expenses; \*BSE 500 TRI is the selected benchmark for the Ambit Good & Clean Mid Cap Portfolio and the same is reported to SEBI.

**How did we deliver this?**

# How did we deliver this?

- Good risk adjusted returns is an **outcome** of **Good Processes** characterized by:

## 1 Stringent quantitative filters

- Each offering is based on deeply researched and back tested framework to generate the investment universe
- High threshold for performance over long spans of time, greatly minimize chances of poor performers or poor quality companies entering into the investment universe
- High quality of accounts and corporate governance is uncompromised

## 3 Focus on earnings growth + earnings quality

- Lower obsession with timing when one is investing in a superior calibre of companies
- Companies with a consistent track record and leadership traits are preferred
- Past track record + Future sector potential + Current management capabilities = Comfort on delivering quality earnings

## 2 Experienced team & deep-dive research

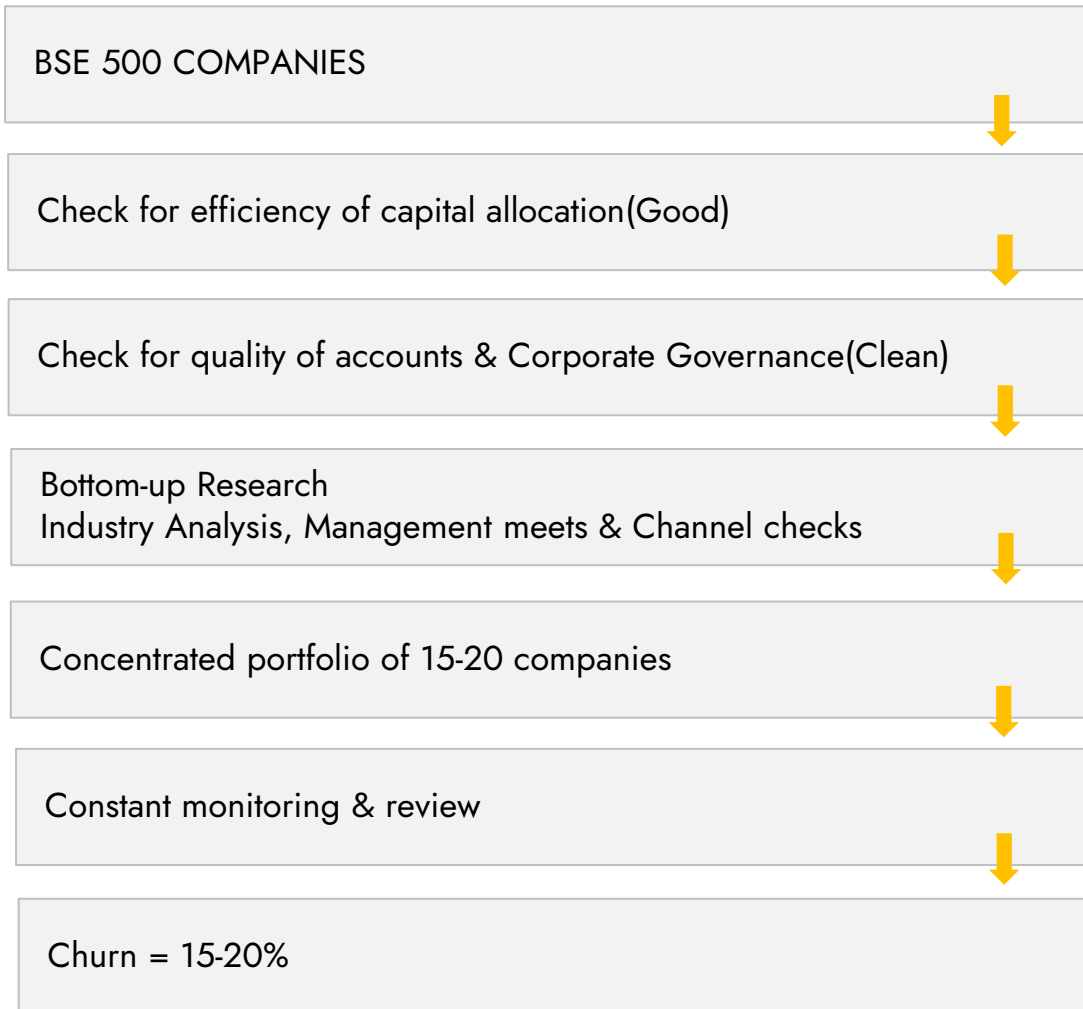

- Dedicated and experienced research team
- Research processes inspired by IE Research
- Investment Committee to approve all investment decisions
- Part of larger Ambit group lends advantages
- Focus on what is knowable and what is important

## 4 Risk management

- Concentrated Portfolios deliver best returns as returns do not get average out
- Lower drawdowns due to consistent performers in secular sectors
- Long term orientation with low churn realize the power of compounding

1

# Stringent quantitative filters

- Invest in firms which are:
  - Good** - On the basis of capital allocation track record and quality of improvement in financial metrics over the past six years, and
  - Clean** - Based on the quality of their accounts & corporate governance.
- The focus on 'good' helps **generate upside** while not compromising on 'clean' **reduces downside risk**. Essentially, while the objective is to generate returns, the even bigger goal is to better manage drawdowns because we believe doing the latter successfully is critically vital in achieving the former.
- Ambit's proprietary 'forensic accounting' framework helps weed out firms with poor quality accounts while our proprietary 'greatness' framework helps identify efficient capital allocators with a holistic approach to consistent growth.
- The result is a **concentrated portfolio** of 15-20 stocks that **draws down lesser** than the market in corrections and has **low churn** (not more than 15-20% of portfolio in any year amounting to 2-3 holdings being replaced).

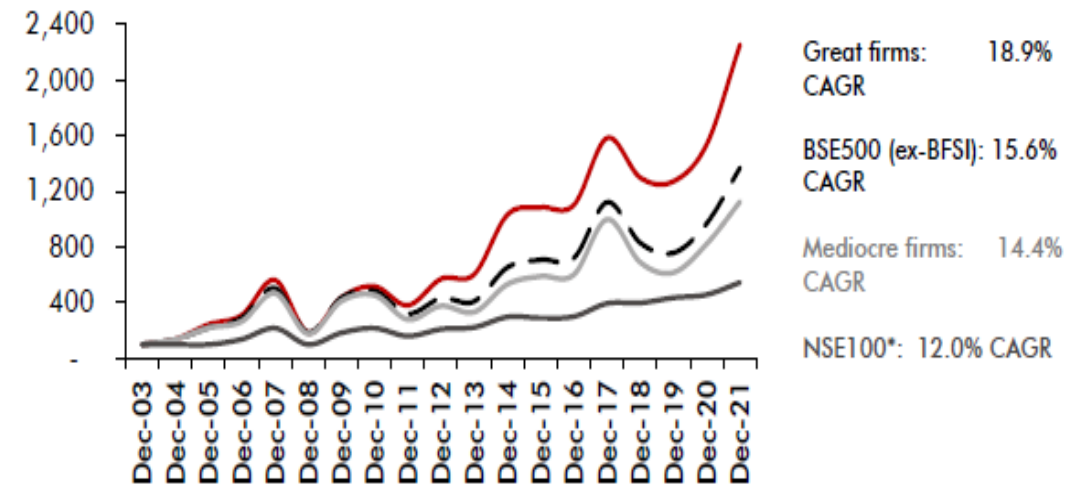

# Focus on 'good' helps generate upside

Ambit's 'greatness' framework identifies efficient capital allocators in the country

Greatness model has outperformed BSE500 by a whopping 3.3% annually

Source : Ambit Capital research, Bloomberg; Note: The back-test is based on annual rebalancing with forward-looking returns being calculated from December 31 of year X to December 31 of year X+1; for example, in the exhibit above, for the most recent year, the framework included numbers until FY21 and returns have been calculated from 31 December 2020 to 31 December 2021. (Note: The above exhibit only considers the share price returns and not the total shareholder returns). \*NSE100 data is considered from Dec-06

Our greatness framework looks at holistic and consistent growth as the hallmarks of efficient capital allocation- a self sufficient growth engine without the need of tapping external capital frequently is key to long term wealth creation.

# Not compromising on 'clean' is critical to managing drawdowns

Ambit's proprietary forensic accounting model helps steer clear firms with questionable accounts

## Accounting checks

### P&L Mis-statement

- Abysmally low CFO/EBITDA ratio over a long run
- High volatility in Depreciation Rates
- Boasting earning through lower debtor provisioning

### B/S Mis-statement

- Low Cash yield implying balance sheet misstatement
- Writing-off losses directly through balance sheet
- High contingent liability

### Pilferage Checks

- High Miscellaneous expenses
- Unsubstantiated capex or delay in plant commissioning
- Historically generating negative free cash flows
- Increasing advances to related party

### Auditor Quality

- High auditor remuneration

Strong link between accounting quality and stock performance

Source: Ace Equity, Capitaline, Ambit Capital research; Note: Accounting score is based on annual financials over FY12-18; stock price performance is from Nov'12 to Nov'18 on a CAGR basis. Universe for this exhibit is BSE500 (ex-BFSI)

# Portfolio Composition & Characteristics

- Stellar track records of capital allocation reflecting high RoE.
- Strong corporate governance & fairness of accounts.
- Strong pedigree of management with high competency and integrity.
- Negligible leverage at portfolio level.
- Growth potential above the comparable index. Median market cap of the portfolio is ~Rs42,574 cr.
- Reasonable valuation for quality stocks

Bubbles refer to individual companies in Good & Clean Portfolio;  
Size of the bubble indicates Market Cap size
