- Our investment approach is built around identifying companies whose DNA is structured in a way that helps them sustain competitive advantages over more than 10-20 years (or longer) consistently.
- Once we have identified such companies, we do a deep-dive understanding of the competitive advantages and their sustainability in future.
- Given the nature of companies that we invest in - healthy and consistent cash generation over the longer term - we believe only in DCF (Discounted Cash Flows) methodology for valuations. This approach allows us to factor in the longevity of consistent returns of a business by giving a visibility of how an industry can realistically develop in future and how a company within that industry can evolve.
